

YOGA FLAT ESD

Yoga Flat ESD reliably ensures the dissipation of electrostatic charges while protecting the floor.

Sizes:

90 cm × 120 cm
110 cm × 120 cm
130 cm × 120 cm
150 cm × 120 cm
180 cm × 120 cm

Thickness:

2,0 mm

Color:

smooth marbled

Material:

caoutchouc

Impact sound insulation: 6 dB

Hardness: 95 Shore A

Slip resistance:

normal / R9 (DIN 51130)

Fire behavior:

Cfl-s1 (EN 13501-1)

Conductivity:

DIN IEC 61340-4-1 : $\leq 106 \text{ Ohm}$

Accessories:

grounding module (included)

An end to technical “thunderstorms”

Yoga Flat ESD ensures the reliable dissipation of static charges and is consequently suitable for workplaces where they occur, such as office workstations, conference rooms, sales counters or information desks.

The environmentally friendly rubber mat is free of outgassing toxins, PVC, phthalate plasticizers and halogens, and is also odorless. Among other things, fire protection properties, chemical resistance and a dirt-repellent surface contribute to the fact that Yoga Flat ESD, which is also suitable for underfloor heating, is an extremely high-quality and wear-resistant floor protection mat.

The rough underside has an anti-slip effect, and office chairs glide smoothly on the castor-proof surface.

Abstract

- reliable dissipation of electrostatic charges (5-year dissipation guarantee)
- vinyl-free and odorless – free of outgassing toxic substances
- increased safety due to high fire protection properties
- resistant to chemicals depending on concentration and exposure time (please request test samples)
- office chairs glide excellently, at the same time chair castor proof
- compatible with floor heating systems
- free of PVC, phthalate plasticizers and halogens
- dirt-repellent surface that is highly durable and wear-resistant
